VALID SIGN

**THE DIGITAL SIGNATURE BOOK  
ON YOUR SMARTPHONE**

## **FASTER AUTHORIZATION PROCESS**

Authorization processes often require the signing of a number of paper documents, with a big waste of time, money and space. With Valid Sign everything is easier: this **innovative solution** allows you to approve and sign documents digitally **from your smartphone**, wherever you are.

## **PLUG AND PLAY**

Valid Sign is a **cloud service, scalable and inexpensive**: you can get it immediately without integration costs and waste of time! The free service includes an App that allows you to approve and sign from your smartphone. The digital signature gives legal value to your documents and can be used on any type of file.

## **WE MANAGE YOUR PROCESSES**

With Valid Sign you can design the approval and signature processes (even the most complex!) with your browser. The **easy and intuitive design** guides you step by step through the workflow composition: create a new file, upload the documents and invite your colleagues to approve and sign, in accordance with your organization's procedures.

## **SIGN AND APPROVE WITH YOUR SMARTPHONE**

If you are involved in a signature and approval process, Valid Sign sends you an email or a push notification: after viewing the documents, sign and approve them with your smartphone or browser. Valid Sign **increases your efficiency**: with a simple action you can put more signatures at the same time, wherever you are.

**Features** Remote Digital Signature / CAAdES, PAdES, XAdES support / visible signature on .pdf files / multiple signature / time stamp / Virtual Private Server for top level privacy / SaaS mode

**Are you a big organization?** Intesi Group can manage enterprise projects for custom implementation in cloud or on premise.
